SUPPLEMENT TO
REPORT NO.

25X1X

1. The Vulkan Enterprise, which is housed in the former "Plumbum" (lead) factory in Susak, has reportedly developed to a considerable extent since World War II. By 1950 its foundry was reportedly completed, railroad tracks had been laid and a road leading to the Enterprise had been constructed.
2. The Vulkan Enterprise, which is classified as a military enterprise, is under the control and supervision of the General Direction of Ships Machinery Industry. The Director of the Enterprise is an unidentified lieutenant colonel, the Chief Engineer is a certain Basic, and a certain Engineer Najgebauer is Chief of an unspecified department in the Enterprise, possibly the foundry.
3. The Vulkan Enterprise produces for the most part cast-iron fittings and equipment for ships, hand and motor reels, light cranes and anchors.
4. Approximately 650 to 700 persons, chiefly Yugoslavs, are employed by the Vulkan Enterprise. There is only one work shift in each department of the Enterprise with the exception of the foundry, where there are three regular work shifts.
